

JOHN R. LEWIS VOTING RIGHTS ACT OF CONNECTICUT

May 2023

I. Introduction

The Connecticut General Assembly is currently considering Senate Bill 1226, An Act Concerning State Voting Rights in Recognition of John R. Lewis (“S.B. 1226”). This landmark bill would provide Connecticut with strong, comprehensive protections for what civil rights icon John Lewis called the “sacred, almost precious” right to vote.¹ It would make Connecticut a national leader on voting rights and equal democracy. In addition to addressing critical local needs, S.B. 1226 would place Connecticut at the forefront of a national movement, building on the success of the John R. Lewis Voting Rights Act of New York and similar state-level voting rights acts in Virginia, Oregon, Washington, and California.²

S.B. 1226 builds on the foundations of both these laws and the federal Voting Rights Act of 1965 to root out discriminatory barriers to the franchise in the Nutmeg State. Its provisions would strengthen democracy for everyone in Connecticut—and would especially help to remove obstacles for Connecticut’s eligible voters of color, who have long been denied an equal opportunity to participate in the political process.

S.B. 1226 would be one of the most comprehensive state voting rights acts in the nation. If enacted, S.B. 1226 would help Connecticut turn the page on its discriminatory past and continue moving toward the goal of truly equitable, inclusive democracy.

II. The Need for Strong Voting Rights Protections in Connecticut

The importance of the right to vote cannot be overstated. The United States Supreme Court has long described voting as a fundamental right, because it is preservative of all other rights.³ Voting is “the citizen’s link to [their] laws and

government”⁴ and “the essence of a democratic society.”⁵ If the right to vote is undermined, the Court has cautioned, other rights “are illusory.”⁶ Thus, in a democracy, safeguarding the right to vote “is a fundamental matter.”⁷

The State of Connecticut long denied this fundamental right to Black citizens and other citizens of color. From its founding through the recent past, Connecticut has a troubling history of racial discrimination in voting. This history includes the use of explicitly racist constitutional provisions regarding who could and could not vote,⁸ English-only literacy tests,⁹ discriminatory local redistricting plans,¹⁰ and voter purges that disproportionately targeted voters of color.¹¹ And, as discussed below, unequal barriers to the franchise persist in Connecticut today, manifesting in long lines at the polls in predominantly Black and Latine¹² neighborhoods and other evidence of disparities in access to the franchise between white voters and voters of color.

A. Connecticut’s History of Voting Discrimination

For most of the nineteenth century, Connecticut restricted the right to vote to white men.¹³ The state enshrined this racial exclusion in its constitution in 1818, at a time when several other New England states allowed some Black men to vote.¹⁴ Subsequently, the people of Connecticut twice voted down proposed amendments that would have extended the right to vote to include men of color by amending the state constitution to strike the word “white” from the provision setting forth the qualifications of electors.¹⁵ Only in 1876—six years *after* the ratification of the Fifteenth

Amendment to the U.S. Constitution outlawed racial discrimination in voting—did Connecticut finally amend its Constitution to remove this explicitly racist language.¹⁶

Connecticut was the first state to enact a literacy test as a requirement for voting, and one of the last to abandon it.¹⁷ Literacy tests like Connecticut’s long functioned as racially discriminatory means of exclusion, because they interacted with language barriers and socioeconomic disparities, including unequal access to education, to produce discriminatory effects—and because election officials often administered them discriminatorily.¹⁸ Furthermore, in 1897, when Connecticut’s literacy requirement was amended to specify that only English literacy counted, the test effectively disenfranchised U.S. citizens who were fluent in other languages but not English, including many eligible Puerto Rican voters who had been educated in Spanish.¹⁹ The literacy test also stood as a barrier for some eligible Black voters who came to Connecticut during the Great Migration from southern states like Georgia and Virginia, where Jim Crow laws had denied them equal access to education, including the chance to learn to read and write..²⁰

Connecticut only began allowing Puerto Rican voters to cast ballots without passing the state’s literacy test in August 1965—and only because the state had no choice after the enactment of the federal VRA, which included a provision drafted specifically to prevent northern states’ use of literacy tests to disenfranchise Puerto Rican voters.²¹ Yet, for other Connecticut voters, the literacy test remained in place until 1970.²² That year, responding to “a long history of the discriminatory use of literacy tests to disfranchise voters on account of their race,” Congress enacted a five-year, nationwide suspension on all such tests.²³ Even then, Connecticut waited until

1976—a year after Congress made the ban permanent—to amend its constitution and finally relinquish its literacy test.²⁴

B. Continued Obstacles and Discrimination in Voting

Connecticut has made progress recently with respect to voting rights, but serious gaps remain in the state’s protection of the rights of Black voters and other voters of color. With no access to early voting as of yet and limited absentee voting, Connecticut has been described as “home to some of the most restrictive voting laws in the country.”²⁵ There is no civil right of action in Connecticut state courts for individual voters who face intimidation at the polls. The minimum language assistance requirements under Section 203 of the federal VRA do not meet the needs of all Connecticut voters with limited English proficiency. And nearly a quarter of Connecticut’s towns and cities—41 of 169—appear to use at-large elections to elect their local legislative bodies.²⁶ The prevalence of at-large election structures—a form of election which, when combined with racially polarized voting or other relevant factors, can “operate to minimize or cancel out the voting strength of racial minorities in the voting population”—raises questions about potential vote dilution (making some voters’ voices weaker than others’ by manipulating election districts) that may be going unchallenged at present.²⁷

These persistent disenfranchising conditions disproportionately prevent or impede voters of color from exercising the right to vote.²⁸ In addition, because of conditions including a lack of investment in election infrastructure, government decisions continue to cause long lines at polling places in Connecticut neighborhoods with higher Black and Latine populations.²⁹ Indeed, across the nation, post-election

surveys³⁰ and analyses of smartphone data³¹ have made clear that Black and Latine voters wait in significantly longer lines than white voters to cast ballots in person. Black voters and other voters of color are also more likely to be unable to take time off work to vote,³² more likely to be asked to vote by provisional ballot,³³ and more likely to have those provisional ballots rejected.³⁴

The restrictive effects of some Connecticut voting laws and practices are further exacerbated by troubling racial disparities in health, housing, employment, education, arrest rates and incarceration, and vehicle ownership.³⁵ As Congress, courts, and academic researchers have recognized, underlying social conditions resulting from past and ongoing discrimination often interact with voting rules to cause or exacerbate disparities in the ability to participate in elections.³⁶ For example, courts have long considered “the effects of discrimination in such areas as education, employment, and health” as relevant to analyzing voting rights violations, because such conditions can “hinder [a minoritized group’s] ability to participate effectively in the political process.”³⁷

state resident population”); Arielle Levin Becker, *Health Disparities in Connecticut: Causes, Effects, and What We Can Do*, Connecticut Health Foundation (Jan. 2020); Cynthia Willner, *Racial and Ethnic Disparities in Earnings, Employment, and Education in Connecticut*, CT Data Collaborative (June 16, 2022), <https://www.ctdata.org/acs-racial-and-ethnicity-disparities> (explaining that “marked disparities still exist in educational attainment, employment and earnings across racial and ethnic groups in Connecticut”); Nat’l Equity Atlas, *Car ownership: Connecticut*, https://nationalequityatlas.org/indicators/Car_access#/?geo=02000000000009000 (reporting that 21% of Black households, 18% of Native American households, 17% of Latino households, and 8% of AAPI households lack access to a vehicle—as compared to only 6% of white households).

³⁶ See, e.g., *Thornburg v. Gingles*, 478 U.S. 30, 44-47 (1986).

³⁷ *Id.* at 36-47 (quoting S. Rep. No. 97-417, at 28-29 (1982), reprinted in 1982 U.S.C.C.A.N. 177, 206-207); see also, e.g., Justin de Benedictis-Kessner & Maxwell Palmer, *Driving Turnout: The Effect of Car Ownership on Electoral Participation* 4 (Aug. 17, 2021), https://scholar.harvard.edu/files/jdbk/files/drivers_turnout.pdf (“Car access has a substantively large impact on voter turnout.”); Amer. Bar Foundation, *Major Empirical Research Effort Finds Incarceration Suppresses Overall Voter Turnout* (Feb. 25, 2014), <https://www.americanbarfoundation.org/news/467>.

One result of these unequal barriers to the franchise is that Connecticut elections are marked by significant racial disparities in voter registration and turnout. With respect to registration, data published by the U.S. Census Bureau shows that **77.4%** of non-Hispanic white citizens in Connecticut were registered to vote as of the November 2020 election.³⁸ By contrast, only **68.6%** of Black citizens, **67.8%** of Latine citizens, and **60.5%** of Asian citizens in Connecticut were registered to vote as of that election.³⁹

With respect to voter turnout, Census data reveal similar disparities. According to the Census Bureau, **71%** of Connecticut’s non-Hispanic white citizens voted in the 2020 election. This compares to only **64.5%** of Connecticut’s Black citizens, **56.6%** of Connecticut’s Asian citizens, and **56.4%** of Connecticut’s Latine citizens.⁴⁰

These disparities strongly indicate the presence of unequal barriers in the registration and voting process that impede participation by eligible Black, Latine, and Asian voters in Connecticut.⁴¹

And turnout is only part of the story. As the Fifth Circuit Court of Appeals has explained, discriminatory barriers to the exercise of the right to vote can constitute an unlawful abridgment of that fundamental right even if some voters overcome the burdens and are able to cast ballots.⁴² As the court observed, “in previous times, some people paid the poll tax or passed the literacy test and therefore voted, but their rights were still abridged.”⁴³ Overcoming unequal burdens does not mean those burdens do not exist. Nor is a two-tiered model of access to the franchise acceptable or lawful.

Today, literacy tests and explicit racial classifications are no longer part of Connecticut’s electoral landscape, but discriminatory barriers to the right to vote persist, perpetuating new forms of the same “insidious and pervasive evil” that Congress enacted the federal VRA to combat.⁴⁴ Clearly, there is significant need for S.B. 1226’s comprehensive protections to remove barriers to equal participation and move Connecticut closer to becoming an equitable, racially inclusive democracy.

³⁸ U.S. Census Bureau, *Voting and Registration in the Election of November 2020* (April 2021), <https://www.census.gov/data/tables/time-series/demo/voting-and-registration/p20-585.html> (Table 4b, Reported Voting and Registration, by Sex, Race and Hispanic Origin, for States: November 2020).

³⁹ *Id.*

⁴⁰ *Id.*

⁴¹ Moreover, recent research indicates that the Census Bureau’s statistics on turnout may overestimate the incidence of voting among communities of color, suggesting that racial turnout disparities may be even greater than Census data reveals. ⁴⁴ See *South Carolina v. Katzenbach*, 383 U.S. 301, 309 (1966).

C. Voting Rights Litigation in Connecticut

Discriminatory practices in local redistricting and election administration in Connecticut have resulted in litigation under the federal VRA by voters of color facing racial vote dilution and wrongful purge practices.

Bridgeport Coalition for Fair Representation v. City of Bridgeport

In 1993 in Bridgeport, for example, Black and Latine voters challenged a redistricting plan for the city council that packed Black and Latine voters primarily into two of the city's ten council districts.⁴⁵ Bridgeport's Black and Latine residents were more than 50% of the population and could constitute a majority of the voting-age population in five compact districts, yet the city's plan created only four districts in which Black and Latine voters had an opportunity to elect candidates of their choice. After plaintiffs sued under Section 2 of the federal VRA and the Fourteenth and Fifteenth Amendments to the U.S. Constitution, a federal district court preliminarily enjoined the city's plan, citing Bridgeport's long history of racial discrimination, its "markedly racially polarized" voting patterns, and other evidence under "the totality of circumstances."⁴⁶ As a remedy, the court instructed Bridgeport to redraw the plan with two majority-Latine districts, two majority-Black districts, and one combined majority-minority "coalition" district.⁴⁷ Instead of implementing this equitable remedy, Bridgeport appealed. The Second Circuit upheld the district court's preliminary injunction,⁴⁸ yet Bridgeport appealed again. The U.S. Supreme Court granted certiorari, vacated the decisions below, and instructed the lower courts to consider the case further in light of a recently issued Supreme Court opinion.⁴⁹ However, the Supreme Court did not call into question any of the lower court's factual findings regarding the discriminatory effects of Bridgeport's plan.⁵⁰ The following year, the city finally settled the case, agreeing to pay plaintiffs' litigation costs and implement the remedy plaintiffs had sought all along—a new redistricting plan for the city council that gave minority voters a fifth opportunity district.⁵¹

Santa v. Cimiano

In 1991 in Hartford, Latine voters challenged a racially discriminatory voter purge process under the federal VRA and the Fourteenth and Fifteenth Amendments to the U.S. Constitution.⁵² Plaintiffs' uncontroverted evidence in the case demonstrated that the government was twice as likely to purge Latine voters from the voter rolls as

⁴⁵ *Bridgeport Coal. for Fair Representation*, 1993 WL 742750, at *4 (noting that Black and Latino residents made up 81.7% of the voting-age population in one district and 84.5% of the voting-age population in a second district.).

other registered voters, and that the government had wrongfully purged voters who still lived in Hartford.⁵³ The court ordered the city to implement a series of measures to address these issues.⁵⁴ However, Hartford failed to comply with the court’s judgment, continuing its discriminatory practices.⁵⁵ In October 1993, the district court was forced to intervene again and enjoined the city “from further failure to implement the judgment in this case.”⁵⁶ Two decades later, in 2013, the court denied a motion by Hartford for relief from the judgment, siding with the plaintiffs, who argued that the evidence showed “every indication that this discriminatory disenfranchisement has continued to date and that the Judgment is still sorely needed to ensure that all Hartford residents have equal access to the polls.”⁵⁷

D. Current Limitations of the Federal Voting Rights Act

The existing federal legislation does not fully address the need for voting rights protections in Connecticut and other states. Although the individual and collective provisions of the federal VRA have been effective at combatting a wide range of barriers and burdens,⁵⁸ federal courts have weakened some of the federal VRA’s protections in recent years, making it increasingly complex and burdensome for litigants to vindicate their rights under the law. As a result, despite the federal VRA’s importance, voters of color often face significant barriers to participating in the political process and electing candidates of their choice.

For nearly 50 years, Section 5 of the federal VRA, the core provision of the legislation, protected millions of voters of color from racial discrimination in voting by requiring certain states and localities to obtain approval from the federal government *before* implementing a voting change.⁵⁹ However, in *Shelby County, Alabama v. Holder*, the United States Supreme Court rendered Section 5’s “preclearance” process inoperable by striking down Section 4(b) of the VRA, which identified the places where Section 5 applied.⁶⁰ As the late Justice Ruth Bader Ginsburg noted in her dissent to the *Shelby* decision: “Throwing out preclearance when it has worked and is continuing to work to stop discriminatory changes is like throwing away your umbrella in a rainstorm because you are not getting wet.”⁶¹ Predictably, the *Shelby County* decision unleashed a wave of voter suppression in states that were previously covered under Section 4(b).⁶²

⁵⁹ 52 U.S.C. § 10304.

⁶⁰ See *Shelby Cty, Ala. v. Holder*, 570 U.S. 529, 557 (2013).

⁶¹ *Id.* at 590 (Ginsburg, J., dissenting).

⁶² See LDF, *Democracy Diminished*, (Oct. 6, 2021), https://www.naacpldf.org/wp-content/uploads/Democracy-Diminished_-10.06.2021-Final.pdf; see also LDF, *A Primer on Sections 2 and 3(c) of the Voting Rights Act 1* (Jan. 5, 2021), <https://www.naacpldf.org/wp-content/uploads/LDF-Sections-2-and-3c-VRA-primer-1.5.21.pdf>.

The *Shelby* decision allowed state and local governments to unleash discriminatory voter suppression schemes virtually unchecked, including barriers to voter registration, cuts to early voting, purges of the voter rolls, strict photo identification requirements, and last-minute polling place closures and consolidations.⁶³ At its pre-*Shelby* strength, Section 5 would have prevented many of the voter suppression schemes that voters of color have encountered since 2013. .

This onslaught accelerated after the 2020 election. Despite a global pandemic and persistent racial disparities in voter participation, 2020 saw historic levels of participation both overall and by voters of color.⁶⁴ Voters overcame obstacles and unnecessary barriers to make their voices heard—and the robust turnout engendered a swift backlash among those who fear the inclusive, multiracial democracy the U.S. can and must become. Following that election, in 2021, state lawmakers introduced more than 440 bills with provisions that restrict voting access in 49 states, and 34 such laws were enacted.⁶⁵ This wave of harmful legislation shows no signs of abating—as of February 2023, lawmakers in 32 states had already introduced or pre-filed at least 150 additional restrictive voting bills to be considered in the current legislative sessions.⁶⁶

Section 2 of the federal VRA offers a private right of action—which means that a person is legally entitled to file a lawsuit—regarding any voting practice or procedure that “results in a denial or abridgment of the right of any citizen of the United States to vote on account of race.”⁶⁷ But Section 2 litigation imposes a high bar for plaintiffs. Such cases are expensive and can take years to reach resolution.⁶⁸ Section 2 lawsuits generally require multiple expert witnesses for both plaintiffs and defendants.⁶⁹ Plaintiffs and their lawyers risk at least six- or seven-figure expenditures in Section 2 lawsuits.⁷⁰ Individual plaintiffs, even when supported by civil rights organizations or private lawyers, often lack the resources and specialized legal expertise to effectively prosecute Section 2 claims.⁷¹ Moreover, even when voters ultimately prevail in the lawsuits, several unfair elections may be held while the litigation is pending, subjecting

voters to irreparable harm.⁷² Due to these challenges, some potential Section 2 violations are never identified, addressed, or litigated in court.⁷³

Section 2 claims are also expensive for jurisdictions to defend, regularly costing states and localities considerable amounts of taxpayer money. Bridgeport experienced these costs firsthand in 1995, when Black and Latine residents prevailed in the challenge to Bridgeport’s redistricting plan discussed above.⁷⁴ As part of a settlement agreement, Bridgeport agreed to pay plaintiffs \$175,000 for legal expenses and court costs (nearly \$350,000 in 2023 dollars).⁷⁵ Since then, the costs of such litigation have risen. In a more recent example, the East Ramapo Central School District in New York State paid its lawyers more than \$7 million for a Section 2 lawsuit brought by the local NAACP branch—and, after the NAACP branch prevailed, was ordered to pay over \$4 million in plaintiffs’ attorneys’ fees and costs as well.⁷⁶ In *Veasey v. Abbott*, the federal lawsuit in which LDF challenged the State of Texas’s Voter ID law with other civil rights groups and the U.S. Department of Justice (DOJ), the district court and the Fifth Circuit Court of Appeals required Texas to pay more than \$6.7 million toward the non-DOJ plaintiffs’ documented litigation costs.⁷⁷

Above and beyond its complexity and cost, litigation under Section 2 of the federal VRA simply cannot keep up with the urgency of the political process. Because elections occur frequently, discriminatory electoral maps or practices can harm voters almost immediately after governments change voting rules. However, on average, Section 2 cases can last two to five years, and unlawful elections often take place before a case can be resolved.⁷⁸ Voters of color in Bridgeport experienced this in 1993, when a court held that the city’s redistricting plan violated the federal VRA but still permitted city council elections to proceed under the discriminatory plan that diluted the strength of Black and Latine votes.⁷⁹ By 1995, when new lawful districts were drawn, council members elected under the discriminatory plan had been in power for two years.⁸⁰

III. The CTVRA Provides Comprehensive Protections to Address Discriminatory Barriers to the Franchise.

S.B. 1226 would implement several critical measures to restore and complement protections modeled on the federal VRA and expand the tools available to voters facing discrimination. It would provide efficient, practical ways to identify and resolve barriers to equal participation in local democracy. In addition, it would require local governments with recent records of discrimination to “preclear” certain voting changes *before* they can be implemented, preventing harm to voters. It would also strengthen state-level protections against voter intimidation, deception, and obstruction; expand language assistance for voters with limited English proficiency; and promote transparency by creating a central, publicly accessible hub for election data and information. Each of these provisions is powerful and critically needed in Connecticut.

A. Preclearance

Section 5 of S.B. 1226 will create a “preclearance” program within the Office of the Secretary of the State (“SOTS”), modeled after the program enacted by New York State in 2022,⁸¹ which was based in turn upon the federal VRA.⁸² Through this program, municipalities with recent civil rights violations or other indicators of discrimination would be required to obtain approval from the Secretary of the State or a state court before making changes to certain election rules or practices.⁸³ S.B. 1226 would require these municipalities to demonstrate that changes will not diminish the ability of members of racial or language minority groups to participate in the political process or otherwise violate the CTVRA *before* the changes can be implemented. Through this program, SOTS experts would be able to identify changes that would have a discriminatory impact in advance and prevent them from going into effect.

As Congress recognized in 1965, case-by-case litigation alone is inadequate—too slow and too costly—to eradicate voting discrimination and prevent its resurgence.⁸⁴ Even if voters of color can muster the resources to sue, the discriminatory practices or procedures they challenge can remain in effect for years while litigation is pending. Preclearance relieves voters facing discrimination of the substantial burdens of litigation by “shifting the advantage of time and inertia” from the jurisdiction to the voters themselves.⁸⁵ Thus, instead of voters having to go to court to prove that new election laws and practices are discriminatory, jurisdictions with a history of discrimination must show that new voting laws and practices are *not* discriminatory. For example, when a polling site in a covered municipality is relocated, preclearance will ensure that local officials first justify the shift and show the change is not harmful to voters of color, instead of requiring voters to sue after the fact.

Preclearance at the federal level was effective at protecting voters of color without unduly burdening local election officials. In fact, some covered jurisdictions appreciated preclearance because the process ensured the use of best practices for

⁸¹ NYVRA § 17-210.

⁸² 52 U.S.C. § 10303.

⁸³ See S.B. 1226 § 5.

⁸⁴ *South Carolina v. Katzenbach*, 383 U.S. 301, 314 (1966).

⁸⁵ *Id.*

fostering political participation, particularly among voters of color.⁸⁶ Covered jurisdictions also made clear that they viewed preclearance as a way to prevent expensive and prolonged litigation.⁸⁷ As Travis County, Texas, wrote concerning its own preclearance obligations in a brief defending the constitutionality of Section 5 of the federal VRA in 2009: “If ever there were a circumstance where an ounce of prevention is worth a pound of cure, it is in the fundamental democratic event of conducting elections free of racially discriminatory actions.”⁸⁸

Unlike the federal VRA, which required covered jurisdictions to obtain preclearance for all voting-related changes, S.B. 1226 only requires preclearance for an enumerated set of changes that have been shown to have the potential for discriminatory outcomes.⁸⁹ Where warranted by current conditions, for example, S.B. 1226’s preclearance program would provide expert review of local election administration decisions, including polling-place designations, to ensure they do not lead to long lines and unreasonable wait times.

To determine which jurisdictions are subject to the preclearance requirement, S.B. 1226 sets out a coverage framework consisting of five criteria, or “prongs.”⁹⁰ Each prong is directly tied to past discrimination or assesses other indicia that are relevant to the question of whether the political process is equally accessible. Taken as a whole, the CTVRA’s coverage framework serves to identify jurisdictions where recent violations or other indicia of discrimination substantially increase the risk of current or future problems. Critically, each prong is time-bound, only covering jurisdictions that meet its criteria within a certain number of years. This ensures that the coverage framework responds to current conditions. It also means that jurisdictions are not covered in perpetuity; instead, they can leave coverage automatically after a sustained period of nondiscriminatory voting administration.

While preclearance imposes a small compliance requirement on covered municipalities, it can also save covered municipalities significant time and money by identifying discriminatory policies before they are enacted, thereby avoiding subsequent litigation. Moreover, it will serve as a powerful prophylactic to prevent voting discrimination and promote fairness and equal access to the fundamental right to vote for Connecticut citizens.

⁸⁶ See, e.g., Brief for the States of New York, California, Mississippi, and North Carolina as *Amici Curiae* in Support of Respondents, at 3, *Shelby County, Ala. v. Holder*, No. 12-96 (U.S. 2013), (describing preclearance as “a streamlined administrative process” that “fosters governmental transparency” and “provides substantial benefits to covered States and localities”).

⁸⁷ See, e.g., *id.* at 8-10.

⁸⁸ Brief of Appellee Travis County, *Nw. Austin Municipal Utility District No. 1 v. Holder*, 08-322 at 11 (2009), https://campaignlegal.org/sites/default/files/FINAL_TRAVIS_COUNTY_BRIEF.pdf.

⁸⁹ S.B. 1226 § 5(b).

⁹⁰ *Id.* § 5(c). Under this section of the CTVRA, a municipality is covered for preclearance if:

- (1) The municipality “has been subject to any court order or government enforcement action” based on a voting rights or civil rights violation within the previous 25 years;
- (2) The municipality, “within the three immediately preceding years,” it has failed to comply with its duties under S.B. 1226’s Section 3, pertaining to the statewide database;
- (3) There are substantial racial disparities in arrest rates in the municipality;
- (4) The municipality has seen significant racial disparities in turnout between registered voters of color and other registered voters; or
- (5) The municipality, during the prior ten years, “was found to have enacted or implemented a covered policy without obtaining preclearance” when required to do so. *Id.*

B. Causes of Action to Address Vote Suppression and Dilution

Section 2 of S.B. 1226 provides voters of color, as well as organizations that represent or serve them, with a private right of action against municipalities that adopt policies or practices that result in the impairment or dilution of minority voting strength. The bill incorporates common-sense improvements on federal law, modeled on provisions in similar laws in New York, California, and other states, to make it more efficient for voters with meritorious claims to prove their cases in Connecticut state courts. S.B. 1226 also allows for additional enforcement of these measures by SOTS.

Voter suppression. Section 2(a) of S.B. 1226 provides an efficient framework for prosecuting voter suppression claims. The bill allows voters of color to address practices that create barriers to people of colors’ access to the ballot, including, among other things, inaccessible or insufficient polling locations or wrongful voter purges; or improper election administration decisions or equipment allocations that lead to longer lines.⁹¹ These provisions are especially important in Connecticut, where voters of color have been routinely and disproportionately affected by long lines at polling places.⁹²

Vote dilution. Section 2(b) provides an effective means of identifying and resolving racial vote dilution claims. Modeled on the success of the California Voting Rights Act, as well as measures enacted last year in New York, S.B. 1226 will create a clear and straightforward framework for contesting at-large municipal elections that dilute minority voting strength.⁹³ The bill also provides a practical framework for contesting unfair district-based or alternative methods of election, if those methods interact with the presence of racially polarized voting or other circumstances to impair equal voting rights and create a situation “in which the candidates or electoral choices preferred by protected class members would usually be defeated.”⁹⁴ S.B. 1226 will make this type of litigation less time-intensive and less costly than litigation under the federal VRA—not only for plaintiffs, but for jurisdictions and all parties. These provisions are especially important in Connecticut because of the number of municipalities that currently use at-large elections, which have substantial potential to discriminate against voters of color who are not able to form a majority in a jurisdiction, either on their own or with other likeminded voters.

Notification and safe harbor. Section 2(g) of S.B. 1226 contains important “safe harbor” and notification provisions that provide protections for municipalities who wish to prevent discrimination and work collaboratively with their constituents to resolve potential violations without litigation.⁹⁵ Prospective plaintiffs under S.B. 1226’s measures are required to notify municipalities in writing of any alleged violation before commencing any action in court, unless they are challenging a newly enacted practice or there is evidence that a notification letter would be futile.⁹⁶ Municipalities are then afforded a “safe harbor” period of 50 days during which they may take steps to cure the alleged violation without exposure to litigation. These provisions incentivize

⁹¹ S.B. 1226 § 2(a).

⁹² See sources cited *supra* note 29.

⁹³ S.B. 1226 § 2(b)(2)(A)(i).

⁹⁴ *Id.* § 2(b)(2)(A)(ii).

⁹⁵ *Id.* § 2(g).

⁹⁶ *Id.* § 2(g)(2)(A); *id.* § 2(g)(2)(G).

municipalities to resolve violations amicably, collaboratively, and outside of court. In California, a similar notification and safe harbor procedure has proven highly successful at accomplishing these goals—at least 140 California jurisdictions have voluntarily resolved potential voting rights violations since the California Voting Rights Act was enacted.⁹⁷

C. Civil Protections against Voter Intimidation

S.B. 1226 also provides Connecticut voters with a civil cause of action in state court against voter intimidation, deception, or obstruction.⁹⁸ Voter intimidation is re-emerging as a significant problem across the country. Recent elections have seen extremists showing up at polling places heavily armed; truck caravans driving into Black or Latine neighborhoods to intimidate voters; and police presence at several polling places in communities where the relationship with law enforcement is historically fraught.⁹⁹ Black voters and other voters of color faced particular threats and bore the brunt of voter intimidation in the 2020 election cycle.¹⁰⁰ In the Michigan cities of Detroit and Flint, for example, Black voters received robocalls with deceptive information about when and where to vote.¹⁰¹

Connecticut is not immune from this concerning national trend—and should remain vigilant. In the 2020 election cycle, for example, social media users in Connecticut spread misinformation that could have deterred eligible individuals from participating or led them to question the value of their vote, including false claims that completed ballots were being scattered on Highway 95, or that deceased voters were receiving absentee ballots.¹⁰² Accordingly, S.B. 1226 will provide voters with tools to protect themselves against these growing threats. The bill gives any voter the right to sue a person or group engaging in “acts of intimidation, deception or obstruction that interfere with any elector’s right to vote.”¹⁰³ This supplements protections in the federal VRA and existing state criminal statutes by providing a civil cause of action—enabling courts to “order appropriate remedies that are tailored to address [the] violation” and resolve the harms caused—that is not currently available in Connecticut courts.¹⁰⁴

D. Language Assistance

Providing adequate election assistance to voters with limited English proficiency has also been a problem in Connecticut, a state that enjoys significant language

diversity. Federal law “covers those localities where there are more than 10,000 or over 5 percent of the total voting age citizens in a single political subdivision . . . who are members of a single language minority group, have depressed literacy rates, and do not speak English very well.”¹⁰⁵ Currently, the standard set by federal law only requires 10 municipalities in Connecticut to provide language assistance in voting to Spanish-speaking voters.¹⁰⁶ As other states and localities (including California and New York)¹⁰⁷ have done, Connecticut can and should provide language assistance well above the federal statutory minimum. S.B. 1226 establishes statutory thresholds which cover a broader set of municipalities and enhances language assistance to better enfranchise language-minority voters.¹⁰⁸ S.B. 1226 also improves upon federal law by allowing for language assistance in any language where “a significant and substantial need exists,” even if the language for which assistance is needed is not one of the languages identified for potential coverage in the federal VRA.¹⁰⁹

E. Public Database of Election and Voting Rights Information

Finally, Section 3 of S.B. 1226 will establish a statewide, publicly accessible database of election information and demographic data, housed in the Office of the Secretary of the State.¹¹⁰ This database will provide voters with public information that is critical for voting rights analysis but can often be difficult to access, including redistricting maps in electronic format, Census and American Community Survey data on racial demographics, locations of polling places, anonymized voter files, and district-level election results.¹¹¹

Making this information easily accessible will foster unprecedented transparency in Connecticut’s elections and facilitate evidence-based practices across the state. In concert with S.B. 1226’s other measures, the CTVRA’s database will empower Connecticut voters and community groups to identify and resolve potential

¹⁰⁵ Section 203 of the Voting Rights Act, U.S. Dept. of Justice, <https://www.justice.gov/crt/language-minority-citizens> (last updated Mar. 11, 2020).

¹¹¹ *Id.* § 3(c).

voting rights problems, while also helping election administrators and local officials to understand and address such issues proactively.

IV. Equitable Voting Rights Protections Have Concrete Benefits.

By enacting S.B. 1226's measures, Connecticut can turn the page on its discriminatory past and pave the way for a more equal future. Equitable voting rights protections, like those in the federal VRA and state-level voting rights acts, have had powerful effects in making the democratic process fairer, more equal, and more inclusive. These effects include reducing racial turnout disparities,¹¹² making government more responsive to the needs and legislative priorities of communities of color,¹¹³ and increasing diversity in government office,¹¹⁴ so that elected representatives more fully reflect the communities they serve.

There is also evidence that measures like those in S.B. 1226 can have powerful, downstream benefits in economic equality and health. For example, researchers have concluded that the federal VRA's preclearance program, by making elected officials more accountable to Black voters, brought about improvements in governmental policy and hiring practices that "reduced the wage gap between [B]lack and white workers by around 5.5 percentage points" in covered counties.¹¹⁵ Recent analyses show that incremental improvements in diversity in local representation translate into more equitable educational and policy outcomes.¹¹⁶ And Professor Thomas A. LaVeist of Tulane University, in a landmark study, identified the federal VRA as a causal factor in reducing infant mortality in Black communities where the law's protections had led to fairer representation.¹¹⁷ For these reasons, the American Medical Association has recognized voting rights as a social determinant of health and declared support for

NAACP Legal Defense and Educational Fund, Inc. (“LDF”)

Since its founding in 1940, LDF has used litigation, policy advocacy, public education, and community organizing strategies to achieve racial justice and equity in education, economic justice, political participation, and criminal justice. Throughout its history, LDF has worked to enforce and promote laws and policies that increase access to the electoral process and prohibit voting discrimination, intimidation, and suppression. LDF has been fully separate from the National Association for the Advancement of Colored People (“NAACP”) since 1957, though LDF was originally founded by the NAACP and shares its commitment to equal rights.

ACLU of Connecticut (“ACLU-CT”)

The ACLU of Connecticut defends, promotes, and expands the civil rights and civil liberties of all people in Connecticut through litigation, community organizing and legislative advocacy, and civic education and engagement. We are an inclusive, nonpartisan, and statewide organization within the nationwide American Civil Liberties Union network, powered by our supporters, partners, staff, interns, cooperating attorneys, and our board of directors. Since 1948, we have used our legal and advocacy expertise to protect freedom, justice, and equality.

ACLU-CT is comprised of three nonpartisan, nonprofit organizations: the ACLU of Connecticut, a 501(c)(4) organization which does legislative and organizing advocacy work; the ACLU Foundation of Connecticut, a 501(c)(3) which does litigation and public education work; and the ACLU of Connecticut Rise PAC, a 527 organization which builds the necessary relationships, public awareness, public narratives, and pressure felt by politicians in order to build the political power of people directly impacted by civil rights and liberties issues.
