Submitted Electronically

Brian J. Feldman, Chair
Cheryl C. Kagan, Vice Chair
Senate Education, Energy, and Environment Committee
2 West
Miller Senate Office Building
Annapolis, Maryland 21401

Dear Chair Feldman and Vice Chair Kagan:

On behalf of the NAACP Legal Defense and Education Fund, Inc. (LDF),1 we appreciate the opportunity to submit written testimony in strong support of HB 627, the Automatic Voter Registration-State Correctional Facilities bill.2 This bill would designate the Department of Public Safety and Correctional Services (“DPSCS”) as an automatic voter registration agency and would require the DPSCS to register eligible voters upon release of confinement from a state correctional facility unless the potential voter opts out. The legislation also puts a reporting and transparency measure into place whereby DPSCS must submit a report beginning January 1, 2026, that describes the number of individuals who completed an applicable transaction in the preceding calendar year and the number of those individuals who registered to vote or updated a voter registration record as well as any efforts the agency plans to make to improve the efficiency and effectiveness of the voter registration process.3

Eligible Marylanders may currently be automatically registered to vote when they interact with State agencies like the Motor Vehicle Administration, the Maryland Health Benefit Exchange, local departments of social services, and the Mobility Certification Office in the Maryland Transit

1 Founded in 1940 under the leadership of Maryland native Thurgood Marshall, LDF is America’s premier legal organization fighting for racial justice. LDF has used litigation, policy advocacy, public education, and community organizing strategies to achieve racial justice and equity in the areas of education, economic justice, political participation, and criminal justice. It has been a separate organization from the NAACP since 1957.
Administration. By taking the commonsense approach of extending this automatic registration to formerly incarcerated people as they are released from prison, Maryland will be able to drastically expand access to democracy for the roughly 70,541 men and 16,113 women released from its prisons and jails each year. The impact will be especially significant for Black Marylanders, who endure widespread and persisting discrimination in the criminal legal system and make up 71.54% of the Department of Corrections incarcerated population.

Since Reconstruction, the burden of disenfranchisement based on contact with the criminal legal system has been borne disproportionately by Black Americans. Maryland unfortunately stands out in this respect as a state with one of highest Black prison population rates in the United States. Black people in Maryland are incarcerated at a rate 5.3 times higher than white people, and the areas with the highest incarceration rates are Baltimore City and the Southern Eastern Shore, two communities of historical significance to Black Marylanders. This disproportionate incarceration rate contributes to stark racial disparities in voter registration and turnout in Maryland. U.S. Census data for the 2022 elections reports significant voter registration and turnout disparities between white Marylanders and residents of color, including a more than 10-point turnout gap between white and Black voters and 20 points (or a 50% difference) between white and Latine voters.

By enacting HB627, Maryland can facilitate nearly 87,000 people registering to vote, and help historically marginalized communities have a stronger voice in our multiracial democracy. At present, DPSCS is required to provide each individual who is released from a State or local correctional facility with a voter registration application and documentation with the individual’s discharge papers that informs the individual that their voting rights have been restored. This process is not as effective as automatic voter registration (“AVR”). AVR makes registering “opt-
out” instead of “opt-in.” Therefore, formerly incarcerated individuals who interact with
government agencies, such as DPSCS, are registered to vote or have their existing registration
information updated automatically, unless they actively decline.\textsuperscript{13} The voter’s information is
transmitted to election officials electronically rather than via paper registration forms. These cost-
effective reforms increase registration rates and clean up the voter rolls. For formerly incarcerated
people who are less likely to have a valid driver’s license or health insurance, it is paramount that
DPSCS is designated as an AVR agency as formerly incarcerated people are most likely to interact
with this public agency on a regular basis.

AVR is gaining momentum across the country. In the past seven years, 23 states and the
District of Columbia have adopted AVR in some form,\textsuperscript{14} and the policy has successfully
increased voter registration rates wherever it is implemented.\textsuperscript{15} With HB 627, Maryland has the
opportunity to build upon the Value My Vote Act of 2021,\textsuperscript{16} and continue to push forward pro-
voter policies by breaking down historical barriers to the ballot box for formerly incarcerated
people as they reenter the community.

For the reasons outlined herein, this body should vote favorably on HB 627, Automatic
Voter Registration in State Correctional Facilities. Please feel free to contact Christina Das at (646)
753-2766 or cdas@naacpldf.org with any questions or to discuss the Automatic Voter Registration –
State Correctional Facilities bill in more detail.

Sincerely,

\textit{/s/ Christina Das}
